

PRINCIPALITY OF SEALAND

Prime Minister

Government Declaration 2009.10.1

The PRINCIPALITY OF SEALAND is a sovereign state according to international law. Under its trusteeship the VRIL technology of the 1920s, 1930s and 1940s (flying disk technology) has been enhanced until today we have ready applications in the electrical, mechanical and biological fields. This technology makes use of an irreversible and self-amplifying energising of selected materials. It is technically simple, and the necessary materials are available at low cost almost everywhere on Earth.

The state of development reached allows us now to make the VRIL technology available to an extended circle of users. In this – next to selected private individuals – primarily mid-sized enterprises in the German-speaking countries will be given precedence.

To this the following criteria apply:

1. After individually testing a VRIL device (Sealand Generator, VRIL Staff) membership in the SEALAND BUSINESS CLUB for three years is mandatory in order to participate in the actual testing programme. The applicable yearly dues of 1'800.– € in total are payable in advance. Then the Club members are authorised to use and test the devices without restrictions. The devices, however, remain the property of the state-owned company SEALAND TRADE CORPORATION INTERNATIONAL. Following important new developments the devices may be upgraded without further costs.
2. Further the complete body of VRIL technology may be released for individual research and use when the interested party – in accord with the SEALAND TRADE CORPORATION INTERNATIONAL – pays a minimum of 10'000.– € to the SEALAND VRIL FOUNDATION (Switzerland) (in the course of foundation).
3. Dialogues with interested large enterprises and politically or religiously unattached institutions are being held separately.
4. The former wartime enemies of the German Reich (see UN list of enemy states) are called upon first to sign a peace treaty with the German Reich before being given access to the use of the VRIL technology.

The VRIL energy may and will be used to the benefit of all humanity and will arrest the global misuse of power by the finance and energy sectors.

Further information about the VRIL technology may be found on our Homepage under www.principality-of-sealand.eu.

Johannes W.F. Seiger
